Annual Reporting for Faculty Supported Research Centres and Networks

All Centres (provisional Centres; McGill Centres), Research groups and Networks that receive funding from the Faculty of Medicine are required to provide two components of reporting:

- Annual Report of Activities, Outcomes
- End-of-Year Financial Report/Proposed Budget

The Annual and End of Year Reports covering the period from the 1st May until the 30th April are due by 4pm on May 26th 2017. Future funding will be dependent on the prompt receipt of all documents as well as the evaluations made by the committee *and* the Faculty funds available.

The completed Annual Report and the Financial Statement should be forwarded by email to:

Annual Report for Faculty of Medicine Funded Centres and Networks

The Annual Report should be set in the context of the Centre's, Core facility's and Network's overall goals and objectives, programs and research priorities, performance indicators outlined in the application (or subsequently developed), activities and strategies.

Please provide the following:

1. Name of Centre, Unit or Institute:

Réseau de recherche en santé buccodentaire et osseuse (RSBO)
Network for Oral and Bone Health Research

2. Name and contact information of the Director and/or Administrative Assistant:

Faleh Tamimi, co-Director
Faculty of Dentistry
McGill University
2001 McGill College av.
Tel 514-398-7203 ext. 09654
faleh.tamimimarino@mcgill.ca

Christophe Bedos, co-Director
Faculty of Dentistry
McGill University
2001 McGill College av.
Tel 514-398-7203 ext. 0129
christophe.bedos1@mcgill.ca

Andrée Lessard, Coordinator/Manager
Tel 514-398-7203 ext. 00084
Andree.lessard2@mcgill.ca

3. Is the centre recognized as an official Senate approved McGill Research Centre?

Yes No X

4. The date the centre received Senate approval as an official McGill Research Centre

5. Please provide the **URL of the Research Centre's or Network's web site**.

Note: The Research Centre's or Network's website should contain the following information:

- all sources of funding support,
- the List of Members and their institutional affiliation,
- the activities supported by the Research Centre, Core Facility or Network, and

- Annual Reports.

URL: www.rsbo.ca

6. A summary of the past year's goals and objectives, programs and research priorities and any changes to these that may have occurred during the past year. Please indicate the extent to which the objectives have been met. **(limit 200 words)**

The past year was marked by a major restructuring of the executive committee. In addition to the new affiliated institution (McGill), two co-directors and a coordinator/manager were recruited in winter/spring 2018. As results, the past year consisted of a transition period where the prior executive committee mainly focused their work on completing actual projects, meeting the new directors and managing a smooth transfer of the funds from the Université de Montréal to McGill University.

Despite the changes, all the current programs were maintained in the 2017-2018 fiscal year: salary support to graduate students and postdocs; major structuring projects; support to common infrastructures and conferences support. The scientific committee carefully examined all the requests, but also participated in the recruitment process.

As the new team is defining their objectives and goals for the next year, the financial support of partners such the Faculty of Medicine would certainly help in carrying on the actual programs and support the implementation of new initiatives to raise public awareness on oral and bone health.

7. Please document **the major achievements** resulting from the use of the Funds from the Faculty, including any advances in knowledge, relevant publications, or international collaboration. You may select from the menu of reporting items/performance indicators in Appendix 1 that may be relevant, but must include, at minimum, information on publications/presentations, outreach activities, quality of the training environment. (Please limit your text response to a maximum of **1 page of prose. Please include lists of publications, grants, activities as appendices.**)

The Faculty of Medicine's annual contribution has always been an important asset for the Network as it demonstrates concretely institutional support for the RSBO members from McGill.

Indeed, for its \$10,000 contribution, the Faculty of Medicine has obtained more than **time return** on its investment **in 2017-2018: \$175,844** have been awarded to Faculty members and their graduate students and post-docs through the various programs of the Network, including a contribution of **\$20,000** to the «C10 Surgical Research Infrastructure at the MGH», and **\$25,000** for the «Centre for Bone Phenotyping», two a common infrastructures used by RSBO and Faculty members. Graduates students and postdocs working with members of the Faculty of Medicine received **\$94,000** in salary support provided by RSBO programs. Through RSBO Major Structuring Projects, Faculty of Medicine members received in 2016-2017, **\$56, 844** in research grants.

- **Publications:** 282 peer reviewed publications by Network members from May 1st, 2015 to April 30, 2016 (list in appendix 2)
- **Number of graduate and post-graduate students funded:** We received:
 - 21 applications to the RSBO scholarships, and allocated 8 scholarships (4 of \$12,000 to M.Sc. students two of them from McGill Medicine: Joan Currie Brooke from Dr Haglund's lab; Muthu Lakshmi Muthu from Dr. Dieter Reinhardt's lab) and 4 of \$15,000 to Ph.D. students; 2 of them to McGill Medicine (; Garthiga Manickam from Dr. Monzur's lab and Jose Ramirez Garcia Luna from Dr Henderson's lab) for a total of **\$54,000**.

- in the Postdoctoral salary program, two fellowships of \$20,000 were allocated to postdoc working with Faculty members (Polly Lama in the Dr Lisbet Haglund’s lab and Louis Doré-Savard in Dr Richard Kremer’s lab) for a total of **\$40,000**.
 - All of these applications were peer-reviewed.
 - **Governance:** The Scientific committee, composed of the Director, 4 axis coordinators, and one representative of the Deans, met 3 times last year. Other important issues were discussed by e-mail. A new advisory committee composed of 4 members, all outsiders to the Network, met in May 2015 and made recommendations to improve the visibility of the Network. Finally, the annual General Assembly opened to all members was held during our Scientific Research Day.
 - **Number of visits, both by members to National or International destinations, events, and short and long term visits by visiting scientists to McGill:** Last year we provided support for 4 graduate students from McGill for a total of \$2,400 through RSBO Conference supports for students.
 - **What/how much additional funding was generated that was directly attributable to activities of the Network:** Last year, the RSBO had \$122,049 in partnership funds on top of the FRQS grant. This sum represented 30 % of the annual operating budget received from the FRQS last year (\$405,000), and made a significant difference in our ability to maintain our programs. These programs of the Network play a significant role as leverage factor to obtain grants for CIHR, NSERC, charities, etc.
 - **What workshops and similar meetings the Network provided financial support to – number, the level of engagement, the purpose and the outcomes (including the number of opportunities for inter-disciplinary research):**

In the last year, RSBO provided \$3,000 to the 3rd Canadian Connective Tissue Conference held at McMaster University in organized jointly by Dr Anie Philip and Dr Dieter Reinhardt of McGill Medicine and Stéphane Roy of U de Montréal Furthermore, the RSBO sponsored two Café scientifiques at the McCord Museum. The first one held in June 2016 focuses on osteomalacia (rickets) diseases – where the skeleton and teeth are soft instead of being appropriately hard to support weight bearing and chewing. It was organized by Dr Marc McKee and Dr Frank Rauch. The speakers presented the discovery of the enzyme replacement therapy for hypophosphatasia – developed largely in Montreal – and now on the market in Canada and many countries worldwide This Café scientifique was recorded and broadcast by Canal Savoir during the fall of 2016.
 - **Collaborations between other Centre, Core Facility or Networks at McGill:** The RSBO financially supported the “C10 Surgical Research Infrastructure at the MGH” and the newly opened “Centre for Bone Phenotyping” at the Shriners Hospital, two common infrastructures required for the laboratories of several members of the Network, for a total amount of **\$45,000**.
8. Please provide a **List of New Members** who joined in the past year (Full, Associate, Trainee noting whether graduate student or post-doctoral fellow) and **institutional affiliations** . Please also indicate any members who have left the Centre or Network. Add rows as necessary.
- Please indicate total number of members:
- Please indicate total number of McGill Faculty of Medicine members:

Last, First Name	Member Type	Institutional Affiliation(s)
Ferron, Mathieu	Regular	IRCM
Ferland, Guylaine	Regular	Université de Montréal

	Regular	McGill University

9. Please describe how your activities align with the Academic or Research mission (Strategic Research Plan) of the Faculty of Medicine and/or other Faculties at McGill focusing on the activities for the current year and strategic plans for the subsequent year (**limit 200 words**)

RSBO shares with the Faculty of Medicine and of Dentistry many of the implementation strategies stated in the Strategic Plan they published together.

With its Competition on Major Structuring Projects, RSBO aims to encourage interdisciplinary research by supporting new interinstitutional groups in strategic research areas defined in consultations with members and partners.

Through its Aid to Recruitment Program, RSBO supports newly established young researchers selected by their institution.

RSBO cares for the training of the next generation of researchers in oral and bone health by offering salary support to MSc and PhD students as well as postdoctoral fellows. RSBO also support the opportunity for students and post-docs to present their research results to national and international meetings with its Support to Conference Program.

One of the core missions of RSBO is the support of technology platforms. Three of these platforms supported by the RSBO are closely related to the Faculty of Medicine: the Centre for Bone and Periodontal Research led by Dr David Goltzman and the Surgical Research Infrastructure led by Dr Janet Henderson and the newly established

10. Other information:

Please indicate how the Research Centre, Core Facility or Network has:

- Tackled or plans to tackle issues in a manner that may not otherwise have been achievable without the financial support of the Faculty of Medicine
- Increased or is planning to increase the scale and focus of research activities
- Facilitated multidisciplinary, multi-institutional or international collaborations
(Please limit response to **200 words**)

Two years ago the RSBO launched a Major Structuring Projects programs aimed at facilitating multidisciplinary, multi-institutional research tackled by new teams working on research priorities defined in collaboration with our partners. Currently, the RSBO supports five teams. McGill Medicine researchers are leads on two of these teams: Dr Janet Henderson and Dr Monzur Murshed are lead investigators in two of the five teams. Together, McGill Medicine members were awarded a total of \$56,844 or 31% of the total amount invested by the RSBO in this program this year.

The Year End Financial Report reports on:

- Expenditure of funding provided by the Faculty of Medicine and other sources, towards meeting the objectives of the Research Centre or Network; and
- Details of any in-kind contributions provided to the Centre or Network.
- Please include a projected budget (including request from Faculty of Medicine) for the coming year
- See **Appendix 2** for the “Year End Financial Report” form to complete

Appendix 1

Menu of Performance Indicators

The following (non-exclusive) list contains possible activities on which Research Centres, Core Facilities or Networks might report.

Quantitative: Include, as appropriate

- Number of graduate and post-graduate students funded to do various activities;
- Number of proposals from participants to the Centre, Core Facility or Network and the number of activities funded;
- Governance: provide details of management meetings. For example, membership, frequency, attendance, the nature of the meetings and the outcomes.
- Number of workshops, conferences or seminars conducted and the number of attendees (include the number of early career researchers, graduate and/or post-graduate students attending);
- Number of visits, both by members to National or International destinations, events, and short and long term visits by visiting scientists to McGill;
- Number of outreach activities including public lectures (or other forms of engagement with people outside the research community including schools, industry and government agencies);
- Number of publications produced, and their impact factors (only identify those publications that are directly related to the research centre, core facility or network activity);
- Number of targeted activities:
 - involving research interaction for graduate and postgraduate students
 - Industry stakeholder interactions.
- Number of web hits and articles downloaded;
- Survey of Centre, Core Facility or Network participants to ascertain usefulness and user-friendliness of web site;
- Number of Federal and Provincial grant proposals and number of successful proposals as a result of membership in the Centre, Core Facility or Network;
- What/how much additional funding was generated that was directly attributable to activities of the Centre, Core Facility or Network;
- Prizes, special awards to member(s) as a result of Centre, Core Facility or Network activities.

Qualitative: Describe, as appropriate, aspects of:

- Identify those activities/outcomes which may not have occurred without the formation of the Centre, Core Facility or Network.
- What sort of different sharing /collaboration (research ideas, facilities, etc) arose because of the Centre, Core Facility or Network;
- Effectiveness of governance processes in place;
- Different kinds of research generated – research building capacity, or removing impediments to research;
- Breadth of Centre, Core Facility or Network - qualitative aspects;
- Multi-disciplinary collaboration
- Increased or new collaboration and partnerships as a result of Centre, Core Facility or Network activities, and with different types of end users (e.g. industry, government and community groups);
- What workshops and similar meetings the Centre, Core Facility or Network provided financial support to – number, the level of engagement, the purpose and the outcomes (including the number of opportunities for inter-disciplinary research);

- What mechanisms are in place for communication within the Centre, Core Facility or Network membership (e.g. email, newsletters, website, etc);
- National, International activities and/or visitor programs - information about the level of engagement at seminars and workshops (e.g. number of participants) and how these events have contributed or are likely to contribute to the strategic goals of the Centre, Core Facility or Network;
- What exceptional successes, if any, have occurred during the reporting period;
- What disappointments, if any, occurred during the reporting period;
- How new skills have been acquired as a result of research technology;
- Any surveys carried out of members to ascertain any benefits gained from membership of the Centre, Core Facility or Network;
- Outreach activities and how these may have been reported by the media;
- Collaborations between other Centre, Core Facility or Networks at McGill;
- Linkages with international Research Networks;
- Development of tools, software, databases; and
- How the networks between researchers are being strengthened as a result of using web-based and other technologies.
